

ASHIK SHEZAN

I am Shezan a Computer Science student at the American International University-Bangladesh. I have some expertise in the field of web development. Having a good grasp of modern scripting languages like Python and JavaScript, I have efficiency in, task automation, and scripting as well. As a very motivated self-learner and programming and tech enthusiast, I am looking for an opportunity to get myself into the software industry to face new challenges and take my skill set to the next level under proper guidance.

Higher Secondary Certificate

Meherpur Govt. College

2011 - 2013

4.20

Secondary School Certificate

Meherpur Govt. School

2006 - 2011

5.00

WORK EXPERIENCE

Freelance Developer

Online Marketplaces

2020 - Present

Responsibilities

- Currently, I am working as a freelance developer in online marketplaces. Recently I have completed a number of projects on scraping & analyze data, automating workflow, fixing and debugging websites, custom browser extensions, developing websites, and so on.

Executive Member

Boiporun.com

01/2019 - 03/2019

Dhaka

Achievements

- It was a startup basically an online book shop where I assisted to build the database. Apart from that I also had the responsibility to communicate with the book publishers and writers. So while working here I had the opportunity to improve my communication skills.

SKILLS

Python

C

JavaScript
